OBJECTIVE

To contribute to a results-driven organization by applying my analytical, leadership, and interpersonal skills to develop impactful solutions that drive growth and improve performance, while continuously advancing my own professional development.

ABOUT ME

With 13+ years of hands-on experience in full-stack software development and enterprise architecture, I specialize in designing and delivering scalable, cloud-native solutions across diverse industries. My expertise spans both backend and frontend technologies, with a strong focus on the Microsoft ecosystem—including **Azure**, **.NET (C#)**, and **SharePoint**.

I have a proven track record of building robust, secure, and maintainable applications using **microservices architecture**, **containerized deployments (Docker/Kubernetes)**, and **CI/CD pipelines in Azure DevOps**. I excel at integrating complex systems, developing RESTful APIs, and crafting responsive, cloud-connected frontends using **React**, **Angular**, **Node**, **Python**, and modern JavaScript frameworks.

I am now seeking a role where I can continue solving real-world challenges through innovation, clean architecture, and best engineering practices—contributing to impactful digital transformation initiatives.

SKILLS

Cloud & DevOps:

- Expert in developing scalable cloud-native solutions on **Microsoft Azure** using **App Services**, **Functions**, **Logic Apps**, **Cosmos DB**, **Key Vault**, **Application Insights**, **Monitor**, **AI Search/Services**
- 5+ years of experience with **Azure DevOps**, **CI/CD pipelines**, **Docker**, **Kubernetes**, and **APIM**
- Hands-on experience with containerized microservices and cloud-first architecture

Backend:

- 10+ years of experience in **.NET (C#)**, **ASP.NET Core**, RESTful API design, and integration with **SignalR**, **GraphQL**, **RabbitMQ**, **Kafka**
- Proficient in developing and integrating **event-driven systems** and **service-oriented architecture**.

Frontend:

- Skilled in building dynamic, responsive web and mobile applications using **React**, **React Native**, **Angular**, **JavaScript**, **jQuery**
- Developed responsive, interactive front-end apps integrated with backend APIs and Azure services

Platform:

- Microsoft 365 & SharePoint:**
Experienced with deep expertise in **Office 365 (SharePoint Online)**, **SharePoint Server 2010/2013/2016**, and **SharePoint Framework (SPFx)** for enterprise content management and collaboration solutions.
- Power Platform & Automation:**
Proficient in developing business applications and automation workflows using **Power Apps**, **Power Automate**, **Power BI**, and **Nintex (Forms & Workflows)**.

Database Design & Architecture:

- Experienced in designing and implementing robust, normalized, and scalable database architectures tailored for high-performance enterprise applications.
- Proficient in query tuning, indexing strategies, and performance troubleshooting to ensure optimal database responsiveness and minimal latency underload.

- Advanced knowledge of **SQL Server**, including stored procedures, triggers, views, indexing, partitions, and backup strategies for mission-critical systems.
- Hands-on experience with **MongoDB** for flexible, schema-less data modeling and integration with modern web and cloud applications.

DESIGNING:

- Proficient in front-end design and layout using **HTML5, CSS, Bootstrap** and Tools like **ADOBE PHOTOSHOP AND ILLUSTRATOR**

EDUCATION AND CERTIFICATIONS

ACADEMICS

MASTERS IN COMPUTER SCIENCE, [MUHAMMAD ALI JINNAH UNIVERSITY](#), KARACHI - 2018

BACHELORS IN COMPUTER SCIENCE, [VIRTUAL UNIVERSITY OF PAKISTAN](#) - 2007

CERTIFICATIONS

Project Management

CERTIFIED SCRUM MASTER, [SCRUM ALLIANCE](#) - Nov 2023

CERTIFIED PRODUCT OWNER, [SCRUM ALLIANCE](#) - Feb 2024

Software Development

204-AZURE DEVELOPER ASSOCIATE, [MICROSOFT CERTIFICATION](#) - Oct 2021

400 DevOps Engineer Expert, [MICROSOFT CERTIFICATION](#) - Nov 2021

480 - PROGRAMMING WITH HTML5 WITH JAVASCRIPT AND CSS3, [MICROSOFT CERTIFICATION](#) - Feb 2013

412-CONFIGURINGADVANCEDWINDOWSSERVER2012, [MICROSOFT CERTIFICATION](#) - Aug 2014

WORK EXPERIENCE

SOLUTION ARCHITECT/DEVELOPMENT MANAGER, [INJAZAT](#)

Mar 2022 - Present

- Designed and deployed **cloud-native applications on Azure**, leveraging **Functions, Cosmos DB, App Services, and Azure Monitor**
- Led architecture and implementation of **microservices-based systems** with secure **REST API** integrations and event-driven communication (RabbitMQ, Kafka)
- Developed containerized applications using **Docker** and orchestrated deployment with **Kubernetes**
- Implemented architecture & designs by making efficient use of existing technologies and organization skill set.
- Built **CI/CD pipelines using Azure DevOps**, improving delivery speed and reliability
- Formalized a consistent set of standards for UI design, coding, documentation, and specifications to improve and maintain performance and other non-functional aspects of the architecture/design.
- Improved scalability of application deployments by designing and implementing simple but very efficient component load-balancing techniques thereby increasing horizontal scalability.
- Ensuring project deliveries and optimizing overall project performance.
- End-to-end meetings with stakeholders for process improvement, planning, integration, and delivery management.

Technologies:

.Net Core, Azure App Services, SignalR, , Docker, Kubernetes, React Native, React, Angular, Node, C#, Python, Machine Learning, Kafka, RabbitMQ, Azure, CI/CD, SQL Server, GraphQL

SOLUTION ARCHITECT/DEVELOPMENT TEAM LEAD, CONTOUR SOFTWARE

May 2014 - Feb 2022

- Architect and develop database solutions, user interfaces, and web services, ensuring robust and scalable outcomes using **.NET Core, Azure App Services, and SignalR**
- Lead cross-functional collaboration with programmers and developers to define project scope and direction.
- Establish platforms and coding standards for project development, promoting best practices.
- Implemented secure APIs and **cloud-first integrations** for web and mobile platforms
- Provide technical leadership and mentorship to team members, ensuring access to necessary resources and support.
- Facilitate and oversee **scrum** meetings, including daily stand-ups, planning, reviews, and retrospectives, to drive agile methodologies for project success.
- Enabled microservices architecture with **Docker/Kubernetes** for large-scale enterprise systems

Technologies:

.Net Core, Azure App Services, SignalR, React Native, React, Angular, Node, C#, Python, Machine Learning, Kafka, RabbitMQ, Azure, CI/CD, SQL Server, GraphQL, Docker, Kubernetes

PRINCIPAL SOFTWARE ENGINEER, SHAMS SOFTWARE

Apr 2011 - Mar 2014

- Spearheaded development of diverse healthcare solutions, including **CRM systems** and **Android applications**.
- Excelled in requirement elicitation and team collaboration to guarantee project success.
- Masterminded the implementation of **CI/CD pipelines**, enhancing product delivery efficiency.
- Collaborate with cross-functional teams to define, design, and ship new features.
- Troubleshoot, debug, and upgrade existing systems to ensure they meet quality standards.

Technologies:

SharePoint 2016, React, Angular, Sitefinity, Node, C#, RabbitMQ, Azure, CI/CD, SQL Server, REST API's

SENIOR SOFTWARE ENGINEER, ALGORITHM CONSULTING

Aug 2010 - July 2011

- Designed and implemented custom **SharePoint solutions** using **Power Apps** to enhance user interaction, streamline data entry, and support business workflows without the need for custom code.
- Engineered comprehensive **ERP modules** tailored for the textile sector, encompassing import/export and financial operations.
- Delivered robust support across multiple projects, adeptly adapting to client needs with **Agile** methodologies.
- Integrated software components and third-party programs to create fully functional applications.
- Documented system architecture and development processes for future reference and maintenance.

Technologies:

SharePoint, Angular, Node, C#, RabbitMQ, Azure, CI/CD, SQL Server, REST API's

SOFTWARE ENGINEER, NET2APPS TECHNOLOGY

July 2007 - Aug 2010

- Designed, developed, and implemented software applications using **C#, Python, or NodeJS**.
- Spearheaded the design, development, and deployment of software solutions adhering to the SDLC.
- Conducted thorough investigations into problem areas, delivering robust support and resolutions.

- Employed **Agile** methodologies, including Scrum, for iterative development and project management.
- Continuously updated technical knowledge and skills by attending workshops, conferences, and online courses.

Technologies:

Angular, Node, C#, RabbitMQ, Azure, CI/CD, SQL Server
