OBJECTIVE

To leverage my experience in designing API-driven, cloud-native platforms and microservices architectures to build scalable, secure, and high-performance systems, while contributing to enterprise platform engineering initiatives.

ABOUT ME

Solution Architect with 15+ years of experience designing and delivering enterprise-scale, API-driven and cloud-native platforms. Proven expertise in **microservices architecture**, **API Gateway design**, and distributed systems using **AWS** and **Azure**. Experienced in building scalable, secure, and high-performance integration platforms, including **RESTful APIs**, messaging systems, and event-driven architectures. Strong background in **DevOps**, **CI/CD**, and **platform engineering**, with a focus on high **availability**, **performance optimization**, and system **resilience**. Adept at leading cross-functional teams, defining architecture standards, and driving end-to-end solution delivery.

SKILLS

Architecture & Delivery Leadership

Skilled in Software Architecture and System Design, with strong expertise in **Microservices and Cloud-Native Architectures on AWS and Azure**. Experienced in designing **scalable, secure, and highly available distributed systems** using modern architectural patterns such as **Microservices**, **Event-Driven Architecture**, and **Containerized Deployments**.

Proficient in **Cloud Architecture and Services (Compute, Storage, Networking, Serverless, and Managed Databases)** and implementing **Infrastructure as Code (IaC)**, **CI/CD pipelines**, and **DevOps practices** to deliver **resilient, high-performance enterprise platforms**.

Strong focus on **Scalability**, **Fault Tolerance**, **Disaster Recovery**, **Security**, **Performance Optimization**, and **Cost Optimization** within cloud environments.

Experienced in **leading technical design**, **guiding development teams**, **collaborating with stakeholders**, and **producing comprehensive architecture documentation and system diagrams**.

Enterprise Platforms & Microsoft Ecosystem:

Experienced in **Microsoft 365**, **SharePoint Online / Server**, **SPFx**, and **Power Platform (Power Apps, Power Automate, Power BI)**, delivering **enterprise-grade platforms and workflow automation**.

Frontend & Mobile Development:

Experienced in building **modern, responsive web and mobile applications** using **React**, **React Native**, and **Angular**. Skilled in **JavaScript and jQuery** for dynamic user interfaces, with strong expertise in **responsive UI design** and cross-platform compatibility. Proven ability to translate **UI/UX designs into performant, user-centric applications**.

Database & Data Layer:

Highly skilled in **SQL Server database design, architecture, and performance optimization**, including **data modeling and query tuning**. Experienced in working with **MongoDB** and **SQLite** for NoSQL and lightweight data storage solutions.

Backend:

Skilled in **C#, ASP.NET Core, Node.js, and Python**, with strong expertise in **RESTful API design**, authentication (**IAM**, **OAuth**, **JWT**), and scalable backend systems. Experienced in building **responsive web and mobile applications** using **React**, **React Native**, **Angular**, and **JavaScript**.

Cloud & DevOps:

Experienced in **Microsoft Azure and AWS**, **Docker**, **Azure Functions**, **App Services**, and **CI/CD pipelines** using **Azure DevOps**. Highly skilled in **SQL Server**, with experience in **MongoDB** and **SQLite** for scalable data solutions.

Machine Learning & AI:

Experienced in **Python-based data analysis and preprocessing** using **NumPy**, **Pandas**, **Matplotlib**, and **Seaborn**. Skilled in applying **machine learning techniques** such as **regression**, **classification**, **clustering**, and **decision**.

Proven ability to design **efficient, scalable data layers** supporting enterprise workloads.

trees using **Scikit-learn**. Familiar with **deep learning fundamentals** using **TensorFlow and Keras**, and experienced in **OCR and text extraction** using **Tesseract (Pytesseract)**.

WORK EXPERIENCE

SOLUTION ARCHITECT/DELIVERY AND ENGINEERING LEADERSHIP, INJAZAT

Mar 2022 - Present

- Led architecture and delivery of **10+ enterprise applications** supporting thousands of users across government and private-sector clients.
- Designed and implemented **efficient component-level load-balancing techniques**, significantly improving **horizontal scalability and application reliability** using **EC2, ALB, Auto Scaling, and RDS with Multi-AZ deployment**.
- Defined and governed **solution architecture**, including **component design, integration patterns, and deployment strategies**.
- Designed and implemented **API Gateway-based architectures** to manage and **secure** microservices communication.
- Designed API-driven platforms integrating **15+ systems**, reducing manual processing time by **40%**.
- Provided **technical leadership** to cross-functional teams, guiding Agile sprints, backlog prioritization, and architectural decision-making.
- Implemented authentication and authorization mechanisms using **OAuth2, JWT, and IAM policies**.
- Designed event-driven communication using **Kafka** and **RabbitMQ** for decoupled system interactions.
- Defined **API standards, versioning** strategies, and governance practices across enterprise applications.

Technologies & Architecture Expertise:

AWS (EC2, S3, RDS, Lambda, VPC, CloudFront, IAM), Platform Engineering, API Platform Design, Service Mesh (basic knowledge), API Gateway (Kong/Cloud-native), Integration Patterns, Azure, Cloud Architecture, High Availability, Scalability, Microservices, Event-Driven Architecture, REST APIs, .NET Core, Node.js, Python, SQL Server, MongoDB, Kafka, RabbitMQ, Docker, Kubernetes, CI/CD

PROJECT MANAGER/DEVELOPMENT LEAD, CONTOUR SOFTWARE

May 2014 - Feb 2022

- Managed end-to-end delivery of **enterprise applications** using Agile methodologies and **Azure DevOps**.
- Architect and develop database solutions, user interfaces, and **web services**, ensuring robust and scalable outcomes.
- Lead cross-functional collaboration with programmers and developers to define project scope and direction.
- Establish platforms and **coding standards** for project development, promoting best practices.
- Conduct evaluations of existing software solutions to pinpoint areas for enhancement.
- Provide **technical leadership and mentorship** to team members, ensuring access to necessary resources and support.
- Facilitate and oversee scrum meetings, including daily stand-ups, planning, reviews, and retrospectives, to drive agile methodologies for project success.
- Coordinate with stakeholders to accurately and efficiently translate and fulfill client requirements.

Technologies:

C#, Node, Python, Machine Learning, React Native, React, Angular, Power Apps, Power Automate, Office 365, Kafka, RabbitMQ, Azure, CI/CD, SQL Server, Docker, Kubernetes

PRINCIPAL SOFTWARE ENGINEER, SHAMS SOFTWARE

Apr 2011 - Mar 2014

- Spearheaded development of **diverse healthcare solutions**, including **CRM systems** and Android applications.
- Excelled in requirement elicitation and **team collaboration** to guarantee project success.
- Masterminded the implementation of **CI/CD pipelines**, enhancing product delivery efficiency.
- Collaborate with cross-functional teams to define, design, and ship new features.
- Troubleshoot, debug, and upgrade existing systems to ensure they meet **quality standards**.

Technologies:

C#, Sitefinity, Node, SharePoint 2016, IAM, Azure, CI/CD, SQL Server, REST API's

SENIOR SOFTWARE ENGINEER, ALGORITHM CONSULTING

Aug 2010 - July 2011

- Engineered comprehensive ERP modules tailored for the **textile sector**, encompassing import/export and **financial operations**.
- Delivered robust support across multiple projects, adeptly adapting to client needs with **Agile methodologies**.
- **Integrated software components** and third-party programs to create fully functional applications.
- Documented system architecture and development processes for future reference and maintenance.

Technologies:

Node, C#, SharePoint, Angular, RabbitMQ, Azure, CI/CD, SQL Server, REST API's

SOFTWARE ENGINEER, NET2APPS TECHNOLOGY

July 2007 - Aug 2010

- Designed, developed, and **implemented software applications** using C#, Python, or NodeJS.
- Spearheaded the design, development, and deployment of software solutions adhering to the **SDLC**.
- Conducted thorough investigations into problem areas, delivering robust support and resolutions.
- Employed Agile methodologies, including Scrum, for iterative development and project management.
- Continuously updated technical knowledge and skills by attending **workshops, conferences, and online courses**.

Technologies:

C#, Angular, Node, AMQ, Azure, CI/CD, SQL Server

EDUCATION AND CERTIFICATIONS

ACADEMICS

MASTERS IN COMPUTER SCIENCE, MUHAMMAD ALI JINNAH UNIVERSITY, KARACHI - 2018

BACHELORS IN COMPUTER SCIENCE, VIRTUAL UNIVERSITY OF PAKISTAN - 2007

CERTIFICATIONS

PMI Certified: PROJECT MANAGEMENT PROFESSIONAL (PMP)®

AWS Certified: Solutions Architect – Associate (SAA-C03)

CERTIFIED SCRUM MASTER, SCRUM ALLIANCE

CERTIFIED PRODUCT OWNER, SCRUM ALLIANCE

Microsoft Certified: Azure Developer Associate (AZ-204)

Microsoft Certified: DevOps Engineer Expert (AZ-400)

Microsoft Certified: Programming in HTML5 with JavaScript and CSS3 (Exam 70-480)

Microsoft Certified: CONFIGURING ADVANCED WINDOWS SERVER 2012 (Exam 412)
