OBJECTIVE

To contribute to a results-driven organization by applying my analytical, leadership, and interpersonal skills to develop impactful solutions that drive growth and improve performance, while continuously advancing my own professional development.

ABOUT ME

Senior **Data Scientist / ML Engineer** with 13+ years of experience delivering **data-driven** and **AI-powered solutions** across **enterprise platforms**. Experienced in **predictive modeling**, **machine learning**, and **large-scale data analytics**, with strong expertise in **Python**, **SQL**, and **cloud-based data platforms**. Skilled in building **scalable AI pipelines**, integrating **AI capabilities with enterprise systems**, and translating **complex operational data into actionable insights**. Proven track record of leading **cross-functional teams** and delivering **high-impact AI solutions** that improve **performance, efficiency, and decision-making**.

SKILLS

Machine Learning & AI:

Experienced in **Python-based data analysis and preprocessing** using **NumPy**, **Pandas**, **Matplotlib**, and **Seaborn**. Skilled in applying **machine learning techniques** such as **regression**, **classification**, **clustering**, and **decision trees** using **Scikit-learn**. Familiar with **deep learning fundamentals** using **TensorFlow** and **Keras**, and experienced in **OCR and text extraction** using **Tesseract (Pytesseract)**.

- Predictive Modelling: **Regression**, **Classification**, Clustering, Time-Series Forecasting
- Machine Learning: **scikit-learn**, **supervised** & **unsupervised learning**, **model evaluation**
- Optimization & OR: Resource allocation, capacity optimization, workflow optimization
- Data Analysis: **pandas**, **NumPy**, exploratory data analysis (**EDA**), feature engineering
- Streaming & Events: **Kafka**, **RabbitMQ** (real-time data pipelines)
- Visualization: **Power BI**, **matplotlib**, dashboards for operational insight

Enterprise Platforms & Microsoft Ecosystem:

Experienced in **Microsoft 365**, **SharePoint Online / Server**, **SPFx**, and **Power Platform** (Power Apps, Power Automate, Power BI), delivering **enterprise-grade platforms and workflow automation**.

Frontend & Mobile Development:

Experienced in building **modern, responsive web and mobile applications** using **React**, **React Native**, and **Angular**. Skilled in **JavaScript** and **jQuery** for dynamic user interfaces, with strong expertise in **responsive UI design** and cross-platform compatibility. Proven ability to translate **UI/UX designs into performant, user-centric applications**.

Database & Data Layer:

Highly skilled in **SQL Server database design, architecture, and performance optimization**, including **data modeling and query tuning**. Experienced in working with **MongoDB** and **SQLite** for NoSQL and lightweight data storage solutions. Proven ability to

Backend:

Skilled in **C#**, **ASP.NET Core**, **Node.js**, and **Python**, with strong expertise in **RESTful API design**, authentication (**IAM**, **OAuth**, **JWT**), and scalable backend systems. Experienced in building **responsive web and mobile applications** using **React**, **React Native**, **Angular**, and **JavaScript**.

Cloud & DevOps:

Experienced in **Microsoft Azure** and **AWS**, **Docker**, **Azure Functions**, **App Services**, and **CI/CD pipelines** using **Azure DevOps**. Highly skilled in **SQL Server**, with experience in **MongoDB** and **SQLite** for scalable data solutions.

design **efficient, scalable data layers** supporting enterprise workloads.

WORK EXPERIENCE

Senior Data Scientist / ML Engineer - **INJAZAT**

Mar 2022 - Present

- Performed **advanced data analysis on large operational datasets** to identify performance bottlenecks and optimization opportunities.
- Designed and implemented **predictive models** for system behavior, capacity planning, and operational efficiency improvements.
- Designed data architectures supporting **AI workloads**, including **feature engineering pipelines**, model training environments, and scalable data processing frameworks aligned with **Databricks-style analytics platforms**.
- Designed and implemented **efficient component-level load-balancing techniques**, significantly improving **horizontal scalability and application reliability**.
- Collaborated closely with **DevOps, QA, and security teams** to ensure **scalable, secure, and high-quality solutions**.
- Drove **process improvements and delivery KPIs**, increasing team velocity and reducing delivery bottlenecks.
- Led **stakeholder workshops and architecture reviews** for requirements clarification, risk mitigation, integration planning, and delivery sign-off.
- Ensured **continuous optimization of system performance and project outcomes** across multiple initiatives.

Technologies:

Python, SQL, C# (.NET Core), Node.js, Machine Learning (Regression, Classification, Clustering), Predictive Analytics, Data Modelling, Databricks-style Data Platforms, Apache Kafka, RabbitMQ, Microsoft Azure, Databricks-ready Architecture, SQL Server, MongoDB, Power BI, Power Apps, Power Automate, CI/CD Pipelines, Docker, Kubernetes, React, Angular, React Native

Principal Engineer – Data & ML Platforms, **CONTOUR SOFTWARE**

May 2014 - Feb 2022

- Developed **machine-learning-enabled backend services** supporting financial and business platforms.
- Applied **data-driven decision models** to improve system reliability, throughput, and performance.
- Built **analytics-ready APIs and data stores** enabling downstream reporting and predictive analysis.
- Led implementation of **scalable microservices** used for real-time data ingestion and processing.
- Conduct evaluations of existing software solutions to pinpoint areas for enhancement.
- Led implementation of **scalable microservices** used for real-time data ingestion and processing.
- Facilitate and oversee scrum meetings, including daily stand-ups, planning, reviews, and retrospectives, to drive agile methodologies for project success.
- Coordinate with stakeholders to accurately and efficiently translate and fulfill client requirements.

Technologies:

Python, SQL, C# (.NET Core), Node.js, Machine Learning (Regression, Classification, Clustering), Predictive Analytics, Data Modeling, Apache Kafka, RabbitMQ, Microsoft Azure, SQL Server, MongoDB, Power BI, Power Apps, Power Automate, CI/CD Pipelines, Docker, Kubernetes, React, Angular, React Native

PRINCIPAL SOFTWARE ENGINEER, **SHAMS SOFTWARE**

Apr 2011 - Mar 2014

- Spearheaded development of **diverse healthcare solutions**, including **CRM systems** and Android applications.
- Excelled in requirement elicitation and **team collaboration** to guarantee project success.
- Masterminded the implementation of **CI/CD pipelines**, enhancing product delivery efficiency.
- Collaborate with cross-functional teams to define, design, and ship new features.
- Troubleshoot, debug, and upgrade existing systems to ensure they meet **quality standards**.

Technologies:

C#, Sitefinity, Node, SharePoint 2016, IAM, Azure, CI/CD, SQL Server, REST API's

SENIOR SOFTWARE ENGINEER, ALGORITHM CONSULTING

Aug 2010 - July 2011

- Engineered comprehensive ERP modules tailored for the **textile sector**, encompassing import/export and **financial operations**.
- Delivered robust support across multiple projects, adeptly adapting to client needs with **Agile methodologies**.
- **Integrated software components** and third-party programs to create fully functional applications.
- Documented system architecture and development processes for future reference and maintenance.

Technologies:

Node, C#, SharePoint, Angular, RabbitMQ, Azure, CI/CD, SQL Server, REST API's

SOFTWARE ENGINEER, NET2APPS TECHNOLOGY

July 2007 - Aug 2010

- Designed, developed, and **implemented software applications** using C#, Python, or NodeJS.
- Spearheaded the design, development, and deployment of software solutions adhering to the **SDLC**.
- Conducted thorough investigations into problem areas, delivering robust support and resolutions.
- Employed Agile methodologies, including Scrum, for iterative development and project management.
- Continuously updated technical knowledge and skills by attending **workshops, conferences, and online courses**.

Technologies:

C#, Angular, Node, AMQ, Azure, CI/CD, SQL Server

EDUCATION AND CERTIFICATIONS

ACADEMICS

MASTERS IN COMPUTER SCIENCE, MUHAMMAD ALI JINNAH UNIVERSITY, KARACHI - 2018

BACHELORS IN COMPUTER SCIENCE, VIRTUAL UNIVERSITY OF PAKISTAN - 2007

CERTIFICATIONS

CERTIFIED SCRUM MASTER, SCRUM ALLIANCE - Nov 2023

CERTIFIED PRODUCT OWNER, SCRUM ALLIANCE - Feb 2024

204-AZURE DEVELOPER ASSOCIATE, MICROSOFT CERTIFICATION - Oct 2021

400 DevOps Engineer Expert, MICROSOFT CERTIFICATION - Nov 2021

480 - PROGRAMMING WITH HTML5 WITH JAVASCRIPT AND CSS3, MICROSOFT CERTIFICATION - Feb 2013

412-CONFIGURING ADVANCED WINDOWS SERVER 2012, MICROSOFT CERTIFICATION - Aug 2014
