OBJECTIVE

To contribute to a results-driven organization by applying my analytical, leadership, and interpersonal skills to develop impactful solutions that drive growth and improve performance, while continuously advancing my own professional development.

ABOUT ME

Senior Technical Software Engineer with 13+ years of hands-on experience in full-stack development and enterprise-grade systems, specializing in **Microsoft technologies (.NET, C#, ASP.NET Core)** and cloud-ready architectures. Proven ability to build **scalable, high-performance, and secure applications** supporting complex business domains.

Core highlights:

- **Backend Expertise:** C#, .NET Framework, .NET Core, ASP.NET, REST & SOAP APIs, microservices architectures
- **Frontend Experience:** HTML5, CSS3, JavaScript, React, Angular for responsive and user-centric interfaces
- **Architecture & Engineering:** Microservices, clean architecture, design patterns, API-driven systems
- **Cloud & DevOps:** Microsoft Azure, Docker, Kubernetes, CI/CD pipelines, cloud-native deployments
- **Reliability & Performance:** Debugging complex issues, performance tuning, observability and monitoring

Strong track record of contributing as a **hands-on senior engineer within agile teams**, conducting technical design and code reviews, mentoring engineers, and driving engineering best practices. Seeking opportunities to deliver **robust, maintainable, and high-impact software solutions** in large-scale enterprise environments.

SKILLS

Cloud & DevOps:

- Expert in developing scalable cloud-native solutions on **Microsoft Azure** using **App Services, Functions, Logic Apps, Cosmos DB, Key Vault, Application Insights, Monitor, AI Search/Services**
- 5+ years of experience with **Azure DevOps, CI/CD pipelines, Docker, Kubernetes, and APIM**
- Hands-on experience with containerized microservices and cloud-first architecture

Backend:

- 13+ years of experience building enterprise-grade applications using **C#, .NET Framework, .NET Core, and ASP.NET**, with strong focus on scalable **REST & SOAP APIs**, secure service integration, and high-performance backend systems.
- Proficient in developing and integrating **event-driven systems** and **service-oriented architecture**.
- Strong background in applying **software design principles, patterns**, and best practices to build maintainable, testable, and **scalable backend services**.

Frontend:

- Skilled in building dynamic, responsive web and mobile applications using **React, React Native, Angular, JavaScript, jQuery**
- **Developed responsive, interactive front-end apps integrated with backend APIs and Azure services**

Platform:

- **Microsoft 365 & SharePoint:**
Experienced with deep expertise in **Office 365 (SharePoint Online), SharePoint Server 2010/2013/2016, and SharePoint Framework (SPFx)** for enterprise content management and collaboration solutions.
- **Power Platform & Automation:**
Proficient in developing business applications and automation workflows using **Power Apps, Power Automate, Power BI, and Nintex (Forms & Workflows)**.

Database Design & Architecture:

- Experienced in designing and implementing robust, normalized, and scalable database architectures tailored for high-performance enterprise applications.
- Proficient in query tuning, indexing strategies, and performance troubleshooting to ensure optimal database

responsiveness and minimal latency underload.

- Advanced knowledge of **SQL Server**, including stored procedures, triggers, views, indexing, partitions, and backup strategies for mission-critical systems.
- Hands-on experience with **MongoDB** for flexible, schema-less data modeling and integration with modern web and cloud applications.

DESIGNING:

- Proficient in front-end design and layout using **HTML5, CSS, Bootstrap** and Tools like **ADOBE PHOTOSHOP AND ILLUSTRATOR**

WORK EXPERIENCE

SENIOR TECHNICAL SOFTWARE ENGINEER/TECHNICAL LEAD, INJAZAT

Mar 2022 - Present

- Fully participating member of **agile feature teams**, independently delivering **technical design, development, deployment, and maintenance** of enterprise-grade applications.
- Designed and implemented **cloud-native .NET solutions on Microsoft Azure**, leveraging **Azure Functions, App Services, Cosmos DB, and Azure Monitor**.
- Developed containerized applications using **Docker** and orchestrated deployment with **Kubernetes**
- Implemented architecture & designs by making efficient use of existing technologies and organization skill set.
- Built **CI/CD pipelines using Azure DevOps**, improving delivery speed and reliability
- Improved scalability of application deployments by designing and implementing simple but very efficient component load-balancing techniques thereby increasing horizontal scalability.
- Ensuring project deliveries and optimizing overall project performance.
- End-to-end meetings with stakeholders for process improvement, planning, integration, and delivery management

Technologies:

C#, .NET Core, ASP.NET, Azure (Functions, App Services, Cosmos DB, Monitor), Docker, Kubernetes, Kafka, RabbitMQ, SQL Server, SignalR, GraphQL, React, Angular, Node.js, Python

PRINCIPAL TECHNICAL SOFTWARE ENGINEER,, CONTOUR SOFTWARE

May 2014 - Feb 2022

- Architect and develop database solutions, user interfaces, and web services, ensuring robust and scalable outcomes using **.NET Core, Azure App Services, and SignalR**
- Built and maintained **scalable backend services and APIs** support financial and business platforms.
- Establish platforms and coding standards for project development, promoting best practices.
- Implemented secure APIs and **cloud-first integrations** for web and mobile platforms
- Provide technical leadership and mentorship to team members, ensuring access to necessary resources and support.
- Facilitate and oversee **scrum** meetings, including daily stand-ups, planning, reviews, and retrospectives, to drive agile methodologies for project success. Provided **technical guidance and mentorship** to junior and mid-level developers.
- Enabled microservices architecture with **Docker/Kubernetes** for large-scale enterprise systems

Technologies:

C#, .NET Core, Entity Framework NodeJS, .Net Core, Azure App Services, SignalR, React Native, React, Angular, Node, C#, Python, Machine Learning, Kafka, RabbitMQ, Azure, CI/CD, SQL Server, GraphQL, Docker, Kubernetes

PRINCIPAL SOFTWARE ENGINEER, SHAMS SOFTWARE

Apr 2011 - Mar 2014

- Spearheaded development of diverse healthcare solutions, including **CRM systems** and **mobile applications**.
- Excelled in requirement elicitation and team collaboration to guarantee project success.
- Masterminded the implementation of **CI/CD pipelines**, enhancing product delivery efficiency.
- Collaborate with cross-functional teams to define, design, and ship new features.
- Troubleshoot, debug, and upgrade existing systems to ensure they meet quality standards.

Technologies:

C#, ASP.Net, SharePoint 2016, React, Angular, Sitefinity, Node, RabbitMQ, Azure, CI/CD, SQL Server, REST API's

SENIOR SOFTWARE ENGINEER, ALGORITHM CONSULTING

Aug 2010 - July 2011

- Led development of **healthcare and CRM solutions**, including desktop and web applications.
- Engineered comprehensive **ERP modules** tailored for the textile sector, encompassing import/export and financial operations.
- Delivered robust support across multiple projects, adeptly adapting to client needs with **Agile** methodologies.
- Integrated software components and third-party programs to create fully functional applications.
- Documented system architecture and development processes for future reference and maintenance.

Technologies:

C#, .Net, Entity Framework, SharePoint, Angular, Node, RabbitMQ, Azure, CI/CD, SQL Server, REST API's

SOFTWARE ENGINEER, NET2APPS TECHNOLOGY

July 2007 - Aug 2010

- Designed, developed, and implemented software applications using **C#, Python, or NodeJS**.
- Spearheaded the design, development, and deployment of software solutions adhering to the SDLC.
- Conducted thorough investigations into problem areas, delivering robust support and resolutions.
- Employed **Agile** methodologies, including Scrum, for iterative development and project management.
- Continuously updated technical knowledge and skills by attending workshops, conferences, and online courses.

Technologies:

C#, Angular, Node, Python, RabbitMQ, Azure, CI/CD, SQL Server

EDUCATION AND CERTIFICATIONS

ACADEMICS

MASTERS IN COMPUTER SCIENCE, MUHAMMAD ALI JINNAH UNIVERSITY, KARACHI - 2018

BACHELORS IN COMPUTER SCIENCE, VIRTUAL UNIVERSITY OF PAKISTAN - 2007

CERTIFICATIONS

CERTIFIED SCRUM MASTER, SCRUM ALLIANCE - Nov 2023

CERTIFIED PRODUCT OWNER, SCRUM ALLIANCE - Feb 2024

204-AZURE DEVELOPER ASSOCIATE, MICROSOFT CERTIFICATION - Oct 2021

400 DevOps Engineer Expert, MICROSOFT CERTIFICATION - Nov 2021

480 - PROGRAMMING WITH HTML5 WITH JAVASCRIPT AND CSS3, MICROSOFT CERTIFICATION - Feb 2013

412-CONFIGURING ADVANCED WINDOWS SERVER 2012, MICROSOFT CERTIFICATION - Aug 2014
