WORK EXPERIENCE

SOLUTION ARCHITECT / DELIVERY AND ENGINEERING LEAD, INJAZAT

Mar 2022 - Present

- Led customer-facing workshops and technical discovery sessions for **15+ enterprise initiatives**, translating business requirements into solution architectures and delivery roadmaps.
- Managed project planning, **risk mitigation**, resource allocation, and stakeholder communication across multiple concurrent enterprise projects, ensuring successful delivery within scope, schedule, and budget constraints.
- **Collaborated** with architects, developers, and business stakeholders to deliver cloud-native and **AI-enabled solutions** supporting digital transformation initiatives across government and commercial sectors.
- Evaluated and delivered **AI and Generative AI proof-of-concepts**, enabling automation opportunities and reducing manual processing efforts through intelligent solutions.
- Delivered cloud-native, **microservices-based**, and **AI-enabled** solutions on **AWS** and **Azure** platforms.
- Defined **solution architectures**, integration patterns, **API strategies**, and cloud deployment models for scalable **enterprise** platforms.
- Provided **technical governance** and delivery oversight for Agile teams of up to **10–15 engineers**, improving delivery predictability and ensuring adherence to architecture and quality standards.
- Facilitated **stakeholder engagement** and solution planning activities, aligning business objectives with technical deliverables and accelerating project decision-making processes.
- Managed project risks, dependencies, and resource utilization across multiple workstreams, contributing to improved delivery efficiency and **stakeholder satisfaction**.

AI & INTELLIGENT AUTOMATION PROJECTS:

OCR And Intelligent Document Processing Platform

- Designed and delivered OCR-based document processing solutions using Python and **Tesseract**.
- Implemented automated text extraction and classification workflows.
- Improved document processing efficiency through automation.

AI-Powered Search And Knowledge Retrieval Platform

- Developed proof-of-concept solutions utilizing embeddings, semantic search, and **Retrieval-Augmented Generation (RAG)** concepts.
- Evaluated vector search architectures and **LLM** integration approaches for enterprise knowledge management.

Machine Learning Analytics Solutions

- Built machine learning models for classification, regression, and clustering using Scikit-learn.
- Performed data preparation, feature engineering, model evaluation, and visualization using Python libraries.

PROJECT MANAGER/DEVELOPMENT LEAD, CONTOUR SOFTWARE

May 2014 - Feb 2022

- Led delivery of 10+ enterprise applications and enhancements serving **5,000+ users** across construction, government, and commercial sectors.
- Managed cross-functional teams of up to **15 engineers**, delivering projects valued at over AED 2M annually.
- Reduced deployment time by 70% through **implementation of CI/CD** pipelines and automated release processes.
- Improved application performance by up to 40% through **architecture optimization**, database tuning, and code refactoring initiatives.
- Increased sprint predictability and delivery efficiency by 30% through **Agile process improvements** and effective backlog management.

PROJECTS:

Warranty Management & Property Management Platform

- Led architecture and delivery of a cloud-based homeowner portal enabling warranty management, maintenance tracking, document management, and customer self-service capabilities for residential builders.
- Managed cross-functional Agile teams of up to 15 members, delivering 20+ major enhancements annually while improving platform performance, scalability, and operational efficiency.

TECHNOLOGIES:

C#, NODE, PYTHON, MACHINE LEARNING, REACT NATIVE, REACT, ANGULAR, POWER APPS, POWER AUTOMATE, OFFICE 365, KAFKA, RABBITMQ, AZURE, CI/CD, SQL SERVER, DOCKER, KUBERNETES

PRINCIPAL SOFTWARE ENGINEER, SHAMS SOFTWARE

Apr 2011 - Mar 2014

- Spearheaded development of diverse healthcare solutions, including CRM systems and Android applications.
- Excelled in requirement elicitation and **team collaboration** to guarantee project success.
- Masterminded the implementation of **CI/CD pipelines**, enhancing product delivery efficiency.
- Collaborate with cross-functional teams to define, design, and ship new features.
- Troubleshoot, debug, and upgrade existing systems to ensure they meet quality standards.

TECHNOLOGIES:

C#, SITEFINITY, NODE, SHAREPOINT 2016, IAM, AZURE, CI/CD, SQL SERVER, REST API'S

SENIOR SOFTWARE ENGINEER, ALGORITHM CONSULTING

Aug 2010 - July 2011

- Engineered comprehensive ERP modules tailored for the textile sector, encompassing import/export and financial operations.
- Delivered robust support across multiple projects, adeptly adapting to client needs with Agile methodologies.
- Integrated software components and **third-party programs** to create fully functional applications.
- Documented system architecture and development processes for future reference and maintenance.

TECHNOLOGIES:

Node, C#, SharePoint, Angular, RabbitMQ, Azure, CI/CD, SQL Server, REST API's

SOFTWARE ENGINEER, NET2APPS TECHNOLOGY

July 2007 - Aug 2010

- Designed, developed, and implemented software applications using C#, Python, or NodeJS.
- Spearheaded the design, development, and deployment of software solutions adhering to the **SDLC**.
- Conducted thorough investigations into problem areas, delivering robust support and resolutions.
- Employed **Agile methodologies**, including Scrum, for iterative development and project management.
- Continuously updated technical knowledge and skills by attending **workshops**, conferences, and online courses.

TECHNOLOGIES:

C#, ANGULAR, NODE, AMQ, AZURE, CI/CD, SQL SERVER
