OBJECTIVE

To contribute to a results-driven organization by applying my analytical, leadership, and interpersonal skills to develop impactful solutions that drive growth and improve performance, while continuously advancing my own professional development.

ABOUT ME

Software Architect with **13+ years of experience** designing and delivering **enterprise-scale software solutions** across diverse domains. Proven expertise in defining **end-to-end system architectures**, leading **cross-functional engineering teams**, and translating **complex business requirements** into **scalable, secure, and high-performance solutions**. Strong background in **cloud-native architectures**, **microservices**, **REST APIs**, and **modern DevOps practices** using **Microsoft Azure**, **CI/CD pipelines**, and **Agile delivery frameworks**. Adept at balancing technical excellence with business objectives, **mitigating architectural risks**, and ensuring **long-term system maintainability**. Seeking a **senior software architecture role** where I can drive **technical strategy**, **mentor engineering teams**, and deliver **high-impact digital platforms**.

SKILLS

Architecture & Delivery Leadership

Skilled in Software Architecture and System Design, with strong expertise in **Microservices and Cloud-Native Architectures on AWS and Azure**. Experienced in designing **scalable, secure, and highly available distributed systems** using modern architectural patterns such as **Microservices, Event-Driven Architecture, and Containerized Deployments**.

Proficient in **Cloud Architecture and Services (Compute, Storage, Networking, Serverless, and Managed Databases)** and implementing **Infrastructure as Code (IaC), CI/CD pipelines, and DevOps practices** to deliver **resilient, high-performance enterprise platforms**.

Strong focus on **Scalability, Fault Tolerance, Disaster Recovery, Security, Performance Optimization, and Cost Optimization** within cloud environments.

Experienced in **leading technical design, guiding development teams, collaborating with stakeholders, and producing comprehensive architecture documentation and system diagrams**.

Enterprise Platforms & Microsoft Ecosystem:

Experienced in **Microsoft 365, SharePoint Online / Server, SPFx, and Power Platform (Power Apps, Power Automate, Power BI)**, delivering **enterprise-grade platforms and workflow automation**.

Frontend & Mobile Development:

Experienced in building **modern, responsive web and mobile applications** using **React, React Native, and Angular**. Skilled in **JavaScript and jQuery** for dynamic user interfaces, with strong expertise in **responsive UI design** and cross-platform compatibility. Proven ability to translate **UI/UX designs into performant, user-centric applications**.

Database & Data Layer:

Highly skilled in **SQL Server database design, architecture, and performance optimization**, including **data modeling and**

Backend:

Skilled in **C#, ASP.NET Core, Node.js, and Python**, with strong expertise in **RESTful API design, authentication (IAM, OAuth, JWT)**, and **scalable backend systems**. Experienced in building **responsive web and mobile applications** using **React, React Native, Angular, and JavaScript**.

Cloud & DevOps:

Experienced in **Microsoft Azure and AWS, Docker, Azure Functions, App Services, and CI/CD pipelines** using **Azure DevOps**. Highly skilled in **SQL Server**, with experience in **MongoDB and SQLite** for scalable data solutions.

Machine Learning & AI:

Experienced in **Python-based data analysis and preprocessing** using **NumPy, Pandas, Matplotlib, and**

query tuning. Experienced in working with **MongoDB** and **SQLite** for NoSQL and lightweight data storage solutions. Proven ability to design **efficient, scalable data layers** supporting enterprise workloads.

Seaborn. Skilled in applying **machine learning techniques** such as **regression, classification, clustering, and decision trees** using **Scikit-learn**. Familiar with **deep learning fundamentals** using **TensorFlow and Keras**, and experienced in **OCR and text extraction** using **Tesseract (Pytesseract)**.

WORK EXPERIENCE

SOFTWARE ARCHITECT/DELIVERY AND ENGINEERING LEADERSHIP, INJAZAT

Mar 2022 - Present

- Led end-to-end **architecture design and delivery** of enterprise-scale applications, aligning technical solutions with business goals, scalability, and performance requirements.
- Designed and implemented **scalable, high-availability architectures** using microservices and distributed system principles.
- Defined and governed **solution architecture**, including system components, integration patterns (REST, messaging), and deployment strategies across cloud environments.
- Collaborated closely with **DevOps, QA, and security teams** to ensure **scalable, secure, and high-quality solutions**.
- Architected **load balancing, auto-scaling, and fault-tolerant systems**, improving application reliability and horizontal scalability.
- Provided **technical leadership** to cross-functional teams, guiding Agile sprints, backlog prioritization, and architectural decision-making.
- Drove **process improvements and delivery KPIs**, increasing team velocity and reducing delivery bottlenecks.
- Led **stakeholder workshops and architecture reviews** for requirements clarification, risk mitigation, integration planning, and delivery sign-off.
- Ensured **continuous optimization of system performance and project outcomes** across multiple initiatives.

Technologies:

AWS (EC2, S3, RDS, Lambda, VPC), Azure, Microservices Architecture, Event-Driven Architecture, REST APIs, .NET Core, Node.js, Python, React, Angular, React Native, SQL Server, MongoDB, Kafka, RabbitMQ, Docker, Kubernetes, CI/CD (Azure DevOps), Power Apps, Power Automate, Machine Learning

PROJECT MANAGER/DEVELOPMENT LEAD, CONTOUR SOFTWARE

May 2014 - Feb 2022

- Managed end-to-end delivery of **enterprise applications** using Agile methodologies and **Azure DevOps**.
- Architect and develop database solutions, user interfaces, and **web services**, ensuring robust and scalable outcomes.
- Lead cross-functional collaboration with programmers and developers to define project scope and direction.
- Establish platforms and **coding standards** for project development, promoting best practices.
- Conduct evaluations of existing software solutions to pinpoint areas for enhancement.
- Provide **technical leadership and mentorship** to team members, ensuring access to necessary resources and support.
- Facilitate and oversee scrum meetings, including daily stand-ups, planning, reviews, and retrospectives, to drive agile methodologies for project success.
- Coordinate with stakeholders to accurately and efficiently translate and fulfill client requirements.

Technologies:

Azure, AWS, C#, Node, Python, Machine Learning, React Native, React, Angular, Power Apps, Power Automate, Office 365, Kafka, RabbitMQ, Azure, CI/CD, SQL Server, Docker, Kubernetes

PRINCIPAL SOFTWARE ENGINEER, SHAMS SOFTWARE

Apr 2011 - Mar 2014

- Spearheaded development of **diverse healthcare solutions**, including **CRM systems** and Android applications.
- Excelled in requirement elicitation and **team collaboration** to guarantee project success.
- Masterminded the implementation of **CI/CD pipelines**, enhancing product delivery efficiency.
- Collaborate with cross-functional teams to define, design, and ship new features.
- Troubleshoot, debug, and upgrade existing systems to ensure they meet **quality standards**.

Technologies:

C#, Sitefinity, Node, SharePoint 2016, IAM, Azure, CI/CD, SQL Server, REST API's

SENIOR SOFTWARE ENGINEER, ALGORITHM CONSULTING

Aug 2010 - July 2011

- Engineered comprehensive ERP modules tailored for the **textile sector**, encompassing import/export and **financial operations**.
- Delivered robust support across multiple projects, adeptly adapting to client needs with **Agile methodologies**.
- **Integrated software components** and third-party programs to create fully functional applications.
- Documented system architecture and development processes for future reference and maintenance.

Technologies:

Node, C#, SharePoint, Angular, RabbitMQ, Azure, CI/CD, SQL Server, REST API's

SOFTWARE ENGINEER, NET2APPS TECHNOLOGY

July 2007 - Aug 2010

- Designed, developed, and **implemented software applications** using C#, Python, or NodeJS.
- Spearheaded the design, development, and deployment of software solutions adhering to the **SDLC**.
- Conducted thorough investigations into problem areas, delivering robust support and resolutions.
- Employed Agile methodologies, including Scrum, for iterative development and project management.
- Continuously updated technical knowledge and skills by attending **workshops, conferences, and online courses**.

Technologies:

C#, Angular, Node, AMQ, Azure, CI/CD, SQL Server

EDUCATION AND CERTIFICATIONS

ACADEMICS

MASTERS IN COMPUTER SCIENCE, MUHAMMAD ALI JINNAH UNIVERSITY, KARACHI - 2018

BACHELORS IN COMPUTER SCIENCE, VIRTUAL UNIVERSITY OF PAKISTAN - 2007

CERTIFICATIONS

AWS Certified Solutions Architect – Associate (SAA-C03), AWS

CERTIFIED SCRUM MASTER, SCRUM ALLIANCE - Nov 2023

CERTIFIED PRODUCT OWNER, SCRUM ALLIANCE - Feb 2024

204-AZURE DEVELOPER ASSOCIATE, MICROSOFT CERTIFICATION - Oct 2021

400 DevOps Engineer Expert, MICROSOFT CERTIFICATION - Nov 2021

480 - PROGRAMMING WITH HTML5 WITH JAVASCRIPT AND CSS3, MICROSOFT CERTIFICATION - Feb 2013

412-CONFIGURING ADVANCED WINDOWS SERVER 2012, MICROSOFT CERTIFICATION - Aug 2014
