OBJECTIVE

To contribute to a results-driven organization by applying my analytical, leadership, and interpersonal skills to develop impactful solutions that drive growth and improve performance, while continuously advancing my own professional development.

ABOUT ME

Senior Systems Engineer with 13+ years of experience designing, implementing, and managing **enterprise IT infrastructure** across **data center, virtualization, and cloud environments**. Skilled in **Windows Server, VMware, Microsoft Azure (IaaS/PaaS), Active Directory, networking, and containerization (Docker/Kubernetes)**. Proven expertise in **capacity planning, performance optimization, system integration, and infrastructure automation** using **PowerShell, Python, Terraform, and Ansible**. Adept at leading cross-functional teams, translating business requirements into **scalable, secure, and high-performance infrastructure solutions**, and ensuring **operational reliability and compliance** in high-availability environments.

SKILLS

Architecture & Delivery Leadership

Skilled in **software architecture and system design**, including **microservices and cloud-native architectures**, with a focus on **scalability, security, and maintainability**. Experienced in **Agile delivery** (Scrum, Kanban, SAFe), **technical leadership**, team mentoring, stakeholder collaboration, and architectural documentation using **Figma, Lucidchart, and Visio**.

Enterprise Platforms & Microsoft Ecosystem:

Experienced in **Microsoft 365, SharePoint Online / Server, SPFx, and Power Platform** (Power Apps, Power Automate, Power BI), delivering **enterprise-grade platforms and workflow automation**.

Frontend & Mobile Development:

Experienced in building **modern, responsive web and mobile applications** using **React, React Native, and Angular**. Skilled in **JavaScript and jQuery** for dynamic user interfaces, with strong expertise in **responsive UI design** and cross-platform compatibility. Proven ability to translate **UI/UX designs into performant, user-centric applications**.

Database & Data Layer:

Highly skilled in **SQL Server database design, architecture, and performance optimization**, including **data modeling and query tuning**. Experienced in working with **MongoDB and SQLite** for NoSQL and lightweight data storage solutions. Proven ability to design **efficient, scalable data layers** supporting enterprise workloads.

Backend:

Skilled in **C#, ASP.NET Core, Node.js, and Python**, with strong expertise in **RESTful API design**, authentication (**IAM, OAuth, JWT**), and scalable backend systems. Experienced in building **responsive web and mobile applications** using **React, React Native, Angular, and JavaScript**.

Cloud & DevOps:

Experienced in **Microsoft Azure and AWS, Docker, Azure Functions, App Services, and CI/CD pipelines** using **Azure DevOps**. Highly skilled in **SQL Server**, with experience in **MongoDB and SQLite** for scalable data solutions.

Machine Learning & AI:

Experienced in **Python-based data analysis and preprocessing** using **NumPy, Pandas, Matplotlib, and Seaborn**. Skilled in applying **machine learning techniques** such as **regression, classification, clustering, and decision trees** using **Scikit-learn**. Familiar with **deep learning fundamentals** using **TensorFlow and Keras**, and experienced in **OCR and text extraction** using **Tesseract (Pytesseract)**.

WORK EXPERIENCE

Sr. Systems Engineer | Architecture & Delivery, **INJAZAT**

Mar 2022 - Present

- Led **end-to-end architecture and delivery of enterprise platforms** across **Microsoft Azure (IaaS/PaaS)** and hybrid infrastructure environments, aligning system design with **business objectives, scalability requirements, and operational reliability**.
- Designed and governed **solution architecture across data center and cloud environments**, including **Microsoft Windows Server infrastructure, virtualization platforms, containerized workloads, and microservices-based deployments**.
- Implemented **cloud-native architectures and cloud adoption strategies**, enabling modernization of legacy systems into **scalable Azure-based platforms and containerized environments**.
- Designed and implemented **efficient component-level load-balancing techniques**, significantly improving **horizontal scalability and application reliability**.
- Collaborated closely with **DevOps, infrastructure, and security teams** to implement **CI/CD pipelines, infrastructure automation, and cloud governance frameworks** using tools such as **PowerShell, Python, and infrastructure-as-code practices**.
- Architected **high-availability systems with load balancing, horizontal scaling, and performance optimization**, improving application reliability and system throughput.
- Supported **enterprise identity and access management integration**, working with **Active Directory, Azure AD, Group Policies, and enterprise security practices**.
- Ensured **continuous optimization of system performance and project outcomes** across multiple initiatives.

Technologies:

.Net Core, Python, NodeJS, React Native, React, Angular, Power Apps, Power Automate, Office 365, Machine Learning, Kafka, RabbitMQ, Azure, CI/CD, MongoDB, SQL Server, Docker, Kubernetes

PROJECT MANAGER/DEVELOPMENT LEAD, **CONTOUR SOFTWARE**

May 2014 - Feb 2022

- Managed end-to-end delivery of **enterprise applications** using Agile methodologies and **Azure DevOps**.
- Architect and develop database solutions, user interfaces, and **web services**, ensuring robust and scalable outcomes.
- Lead cross-functional collaboration with programmers and developers to define project scope and direction.
- Establish platforms and **coding standards** for project development, promoting best practices.
- Conduct evaluations of existing software solutions to pinpoint areas for enhancement.
- Provide **technical leadership and mentorship** to team members, ensuring access to necessary resources and support.
- Facilitate and oversee scrum meetings, including daily stand-ups, planning, reviews, and retrospectives, to drive agile methodologies for project success.
- Coordinate with stakeholders to accurately and efficiently translate and fulfill client requirements.

Technologies:

C#, Node, Python, Machine Learning, React Native, React, Angular, Power Apps, Power Automate, Office 365, Kafka, RabbitMQ, Azure, CI/CD, SQL Server, Docker, Kubernetes

PRINCIPAL SOFTWARE ENGINEER, SHAMS SOFTWARE

Apr 2011 - Mar 2014

- Spearheaded development of **diverse healthcare solutions**, including **CRM systems** and Android applications.
- Excelled in requirement elicitation and **team collaboration** to guarantee project success.
- Masterminded the implementation of **CI/CD pipelines**, enhancing product delivery efficiency.
- Collaborate with cross-functional teams to define, design, and ship new features.
- Troubleshoot, debug, and upgrade existing systems to ensure they meet **quality standards**.

Technologies:

C#, Sitefinity, Node, SharePoint 2016, IAM, Azure, CI/CD, SQL Server, REST API's

SENIOR SOFTWARE ENGINEER, ALGORITHM CONSULTING

Aug 2010 - July 2011

- Engineered comprehensive ERP modules tailored for the **textile sector**, encompassing import/export and **financial operations**.
- Delivered robust support across multiple projects, adeptly adapting to client needs with **Agile methodologies**.
- **Integrated software components** and third-party programs to create fully functional applications.
- Documented system architecture and development processes for future reference and maintenance.

Technologies:

Node, C#, SharePoint, Angular, RabbitMQ, Azure, CI/CD, SQL Server, REST API's

SOFTWARE ENGINEER, NET2APPS TECHNOLOGY

July 2007 - Aug 2010

- Designed, developed, and **implemented software applications** using C#, Python, or NodeJS.
- Spearheaded the design, development, and deployment of software solutions adhering to the **SDLC**.
- Conducted thorough investigations into problem areas, delivering robust support and resolutions.
- Employed Agile methodologies, including Scrum, for iterative development and project management.
- Continuously updated technical knowledge and skills by attending **workshops, conferences, and online courses**.

Technologies:

C#, Angular, Node, AMQ, Azure, CI/CD, SQL Server

EDUCATION AND CERTIFICATIONS

ACADEMICS

MASTERS IN COMPUTER SCIENCE, MUHAMMAD ALI JINNAH UNIVERSITY, KARACHI - 2018

BACHELORS IN COMPUTER SCIENCE, VIRTUAL UNIVERSITY OF PAKISTAN - 2007

CERTIFICATIONS

CERTIFIED SCRUM MASTER, SCRUM ALLIANCE - Nov 2023

CERTIFIED PRODUCT OWNER, SCRUM ALLIANCE - Feb 2024

204-AZURE DEVELOPER ASSOCIATE, MICROSOFT CERTIFICATION - Oct 2021

400 DevOps Engineer Expert, MICROSOFT CERTIFICATION - Nov 2021

480 - PROGRAMMING WITH HTML5 WITH JAVASCRIPT AND CSS3, MICROSOFT CERTIFICATION - Feb 2013

412-CONFIGURING ADVANCED WINDOWS SERVER 2012, MICROSOFT CERTIFICATION - Aug 2014
